

CROSSRUNNER

ADVENTUROUS ENGINEERING.

Honda technicians re-engineered their renowned V4 technology specifically for this bike so that it combines the smooth power surge of a Sports Tourer with the energy of an Adventure bike. To maximise the engine's diverse capabilities, wide handlebars and an upright position have been incorporated; this gives high levels of stability and manoeuvrability while offering all day comfort and great visibility. In addition, Combined Anti-lock Braking System (C-ABS) and the ability to go over 215 miles on a single tank give you the confidence to explore the world like you've never done before.
